

Music Marketing Inc Now Distributes Sonoris

FOR IMMEDIATE RELEASE - November 13, 2023

Music Marketing Inc is pleased to announce that it has become the distributor of Sonoris, a leading developer of high-end audio products for recording and mastering professionals. This partnership further solidifies Music Marketing Inc's position as a leading distributor of high-quality audio products.

Sonoris, founded in 2004 by Pieter Stenekes, has been developing state-of-the-art audio products for over a decade. The company's products are used by some of the world's most renowned recording and mastering professionals and have been used in countless high-profile projects and studios. Their famous Mastering Compressor (SMCP) is a fine example of their dedication in providing the highest possible audio software tools. It is an ultra transparent audio compressor that doesn't add odd harmonic distortion generated by most other compressors.

"We are thrilled to be partnering with Sonoris," said a representative for Music Marketing Inc. "Their products are known for their quality and precision, and we are confident that they will be a great addition to our music brands lineup. We are always looking for ways to provide our global reseller network with the best products on the market, and this partnership is just one example of that."

The entire Sonoris product line is now available to our reputable pro audio and music store resellers at Music Marketing Inc. End users can expect to buy Sonoris software from their music store of choice soon.
